BUSINESS Advisory

RESTRUCTURING & PROCESS MANAGEMENT

In the case of underperforming businesses or Senior Management in distress. Our restructuring system work alongside management, stakeholders, and lenders to help make real improvements to cash flow, profit, and losses on the corporate balance sheet.

From transformation or restructuring capital services, to buying or selling a part of the business during strategic and policy decisions based on valued advise. We see things from your perspective. We define skilled workforce, offer advocate-mediation services, manage process challenges, and employ creativity engineering to harmonize sustainable business finance frameworks while lowering costs associated with daily work..

One of our key measures of success is the achievement of your goals and how to make your core business successful for you

FINANCIAL RISK MANAGEMENT

We help you prepare a well-structured and standardized practice towards protecting economic value in a firm by using financial instruments to manage exposure to financial risk - principally operational risk, credit risk and market risk, with more specific variants as listed aside. As for risk management more generally, financial risk management requires identifying its sources, measuring it, and the plans to address them.

BUILD STANDARDIZED WORKFLOW AND WORK INSTUCTIONS

By our professionals exercised discipline we document every macro and micro process in relations to executives, business, operations, and IT throughout the entire company, regardless of department or team. It might sound easy in theory — just write it down — but in practice, setting up standardized processes throughout your organization is a challenging task..

EFFECTIVE BUSINESS STRATEGIES

Through our comprehensive management reports we give you the choices made with specific targeted areas that allow you to grow your business effectively. Most businesses have goals, plans, or hopes about how to achieve success in their company, but most do not have all the data or tools to build an effective, complete strategy for reaching those goals.

DIGITAL TRANSFORMATION

Digitalization is changing the whole value-added chain and processes in all businesses. It demands new practical business approaches, effective opportunities for organizations in operational and business process development, with effect on internal and external efficiency of Business tasks in parallel with IT. Internet of Things, Industrial Internet, Industry 4.0, Big data, machine to machine communication, blockchain, cryptocurrencies are some of the challenges to be addressed. We can help to recognize trends in time and strengthen the efficiency of processes.

IDENTITY-ACCESS & DATA PROTECTION

The General Data Protection Regulation will enter into force on May 2018. Failing in to comply with the GDPR requirements, the penalties can reach up to 2% of an organizations' annual turnover, and for more serious infringements, the penalties can amount to 4% of an organization's annual revenue. We can help to recognize potential risks in time and provide for cost control.

CYBER SECURITY PROTECTION

Critical Infrastructure Protection is for many business sectors assets, systems, and networks, whether physical or virtual, to be considered so vital that their incapacitation or destruction would have a debilitating effect on security, national economic security, national public health or safety, or any combination thereof. We can help to recognize weak points, identify vulnerabilities, analyses risks and show suitable measures for preventions and reactions.
